CROSS-CASE INTELLIGENCE SIGNALS

No AI-discovered cross-case link is directly associated with this subject.

INVESTIGATOR ASSESSMENT

Subject carries a composite Threat Score of **63/100** (elevated), derived from betweenness, closeness, and degree centrality across the full known-plus-discovered network, weighted alongside prior record and cross-case exposure. Subject has 7 recorded direct connection(s) across 3 case(s). No cross-case signals are currently associated with the subject's network.

Recommended action: Prioritize for financial and communication-record verification; cross-reference associated contacts against other open investigations.
